Live = the current price in each market's official feed, in the local currency: the simple average of the station prices where the feed lists every station, otherwise the regulated maximum, national average or regional prices the source publishes (see the source column). The EU Weekly Oil Bulletin is a different measure (one national average per week).

Greece is not ranked: not collected in the last 36 hours.

Austria is not ranked: only 957 stations with a current price in the official feed, usually about 1,742.

Lithuania is not ranked: not collected in the last 36 hours.

Sweden is not ranked: chain list prices, not pump prices.
