Exchange rates used (1 € =): BAM 1.95583 (fixed parity); DKK 7.475 / 7.4753 / 7.4755 / 7.4756 (ECB reference rate of the record day); ISK 144.1 / 144.4 (ECB reference rate of the record day); MDL 19.978 / 20.2078 / 20.9363 (National Bank of Moldova official rate of the record day); MKD 61.495 / 61.5278 / 61.693 / 61.6938 (National Bank of North Macedonia middle rate of the record day); RON 5.232 / 5.2393 / 5.2765 / 5.2785 (ECB reference rate of the record day); RSD 117.4007 / 117.4021 (National Bank of Serbia official middle rate of the record day); TRY 52.7186 / 55.7975 / 55.8841 (ECB reference rate of the record day); GBP 0.85155 / 0.85411 / 0.86045 (ECB reference rate of the record day); SEK 10.4705 / 10.9502 / 10.9795 (ECB reference rate of the record day). The rate of each record is in the CSV and JSON.

€ values = the unrounded daily average in the local currency divided by the rate of that day, rounded once to 3 decimals; recomputing from the rounded local price can differ by 0.001.

** Sweden: chain list prices, not pump prices — not ranked.

RSD, MKD, MDL (no ECB reference rate): € at the official rate of the record day from the National Bank of Serbia, the National Bank of North Macedonia and the National Bank of Moldova.

Live markets: daily national average from each official feed (the same statistics as our research dataset D2): the mean of the station prices where the feed lists every station (prices outside 0.5–2 × the day's median dropped); the single national regulated maximum price in Moldova, North Macedonia, Serbia and Montenegro and the national average price in Bosnia and Herzegovina; the mean of prefecture averages in Greece and of provincial prices (Petrol Ofisi) in Türkiye; 136 partial market-days are left out (fewer than 80% of the usual number of stations, the same rule as research dataset D2 and our news series). Record = the highest or lowest daily average since the first full day in that market (date per market). Local currency first; € at the exchange rate of the record day: the ECB reference rate or, for the Serbian dinar, Macedonian denar and Moldovan leu, which the ECB does not publish, the official rate of the National Bank of Serbia, North Macedonia or Moldova (Bosnia: fixed parity 1.95583). Inflation adjustment only where we have at least 12 months of data and Eurostat publishes an HICP for the country.

Sweden: chain list prices, not pump prices — not ranked.
